Brackets

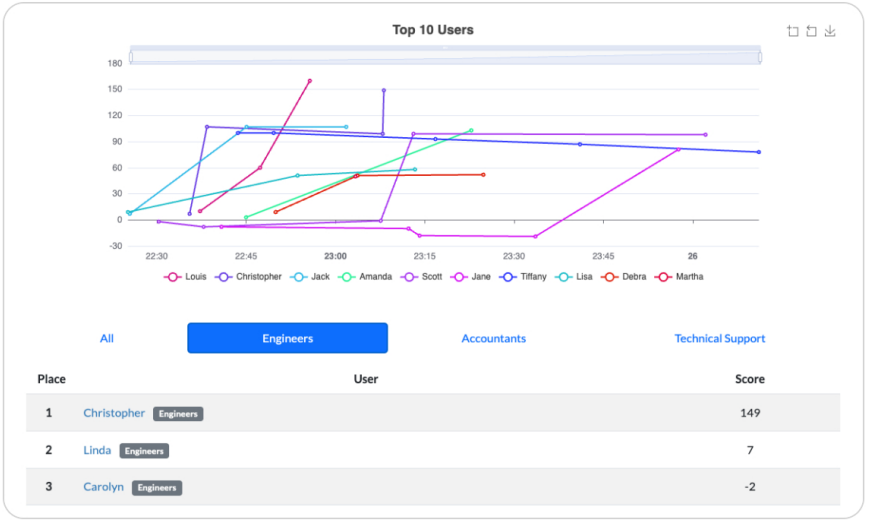
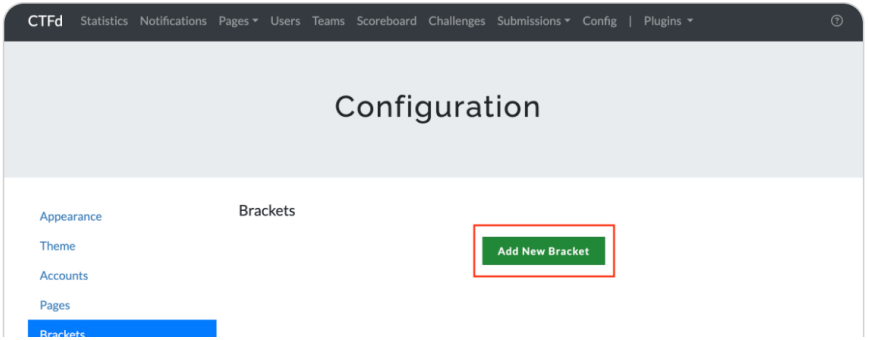
Brackets allow admins to have participants be organized into participation groups for fairer scoring.



How to create Brackets

From the ***Brackets*** tab in the Config page, Admins can create Brackets:



How to create Brackets
Bracket Types
Adding Users or Teams to Brackets
Visibility

1. Click **Add New Bracket**
2. Fill out the information and select **Bracket Type**
3. Click **Save** and repeat for each additional bracket

Bracket Types

- Users - brackets will group users together
- Teams - brackets will group teams together

You'll want to select the type based on your User Mode. For example, if your instance is set to **Team Mode**, your bracket type should be **Teams.**

Adding Users or Teams to Brackets

Users and Teams are required to select a bracket on sign-up.

Admins can also select or change a bracket for users/teams in the Admin Panel.

Visibility

Brackets will be visible on the user facing scoreboard and will follow your instance's Visibility settings.
