# Crisp Chat

**Crisp** is a chat bubble solution that lets you communicate with your users. Crisp has an HTML integration that can be used with CTFd's **Theme Header & Footer**. Below are instructions on adding Crisp's integration with CTFd:

1. Copy Crisp's provided HTML integration code. This can be retrieved from Settings > Website Settings > Integrations. This [video](#) from Crisp shows how to get the code.
2. Add Crisp's integration code into CTFd's Theme Footer in the Config Panel.

## Theme Footer

Theme footers are inserted just before the `</body>` tag on all public facing pages. Requires theme support.

```
1 <script type="text/javascript">window.Crisp=[];window.CRISP_WEBSITE_ID="";(function()
  {d=document;s=d.createElement("script");s.src="https://client.crisp.chat/1.js";s.async=1;d.getElementsByTagName("head")[0].appendChild(s);})();</script>
2 <script>
3 if (init.userEmail) {
4   $crisp.push(["set", "user:email", init.userEmail]);
5 }
6 </script>
```

3. Add the following additional integration after Crisp's integration so that your messages go to the user's email address if they're not available.

```
<!-- Crisp chat integration -->
<script>
  if (init.userEmail) {
    $crisp.push(["set", "user:email", init.userEmail]);
  }
</script>
```

4. Your users should now see a Crisp chat bubble in the bottom right of their screen.

4. Your users should now see a Crisp chat bubble in the bottom right of their pages!
