MajorLeagueCyber Integration

MajorLeagueCyber (MLC) is a CTF Event Tracker developed and maintained by CTFd developers. MLC is designed to provide an official listing of CTF participants and tracking of performance between events.

Integrating with MLC

1. Register an account and/or team at <https://www.majorleaguecyber.org/>.
2. Create your event by going to <https://www.majorleaguecyber.org/events/new>.
3. From the event page, click on the **Edit** button and go to the **Integration** tab.
4. Copy the **Client ID** and **Client Secret** to install into CTFd. These should be put into the **Config** page in the **Admin Panel** under the [MajorLeagueCyber integration settings](#).
5. Install the **Redirect URL** and **Scoreboard API URL** in MajorLeagueCyber. This is typically `https://[CTFd URL]/redirect` and `https://[CTFd URL]/api/v1/scoreboard`.
6. MLC integration should now be configured and the Login with **MajorLeagueCyber** button should now be enabled on CTFd's login and registration pages.

If you would like to limit registration to MLC only, you can configure this in the **Config** page under **Settings** > [Registration Visibility](#).
