

The Custom Fields feature allows you to ask additional information about **users/teams** when they register.

The screenshot shows the 'Custom Fields' settings page. On the left, a sidebar lists various settings categories: Appearance, Theme, Accounts, Custom Fields (which is selected and highlighted in blue), MajorLeagueCyber, Settings, Security, Email, Time, Legal, Backup, and User Mode. The main content area is titled 'Custom Fields' and contains the sub-instruction 'Add custom fields to get additional data from your participants'. Below this, there are tabs for 'Users' and 'Teams', with 'Users' currently selected. A section titled 'Custom user fields are shown during registration. Users can optionally edit these fields in their profile.' is displayed. It includes fields for 'Field Type' (set to 'Text Field'), 'Field Name' (input field), 'Field Description' (input field), and checkboxes for 'Editable by user in profile', 'Required on registration', and 'Shown on public profile'. At the bottom are 'Save' and 'Reset' buttons, and a 'Add New Field' button.

Whether you are creating a custom field for a **user** or a **team**, you get the same options as follows:

Options

- **Field Type**
- **Field Name**
- **Field Description**
- **Editable by user in profile**
- **Required on registration**
- **Shown on public profile**

Field Type

Options
Field Type
Field Name
Field Description
Editable by user or team admin in profile
Required on registration
Shown on public profile

Allows you to choose the type of input. The available inputs are:

- Text Field
- Checkbox

Editable by user or team admin in profile

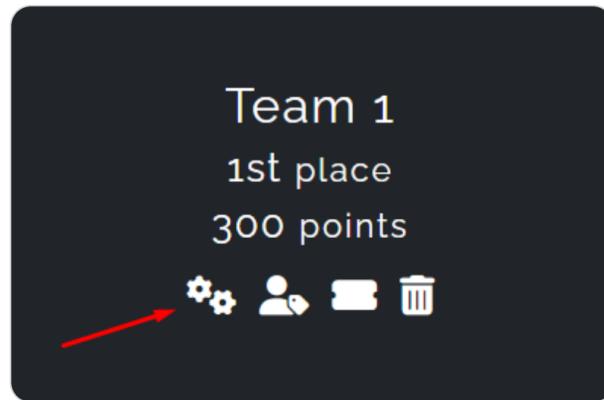

Specify if the field can be edited in the user or team's profile.

- Editable by user in profile
- Required on registration
- Shown on public profile

Users can edit the specified field/s at `/settings` > **Profile** tab.

Team captain can edit the specified field/s `/team` > **Edit Team** gear icon.

Required on registration

Specify if the field is **required** or **optional** on registration.

- Editable by user in profile
- Required on registration
- Shown on public profile

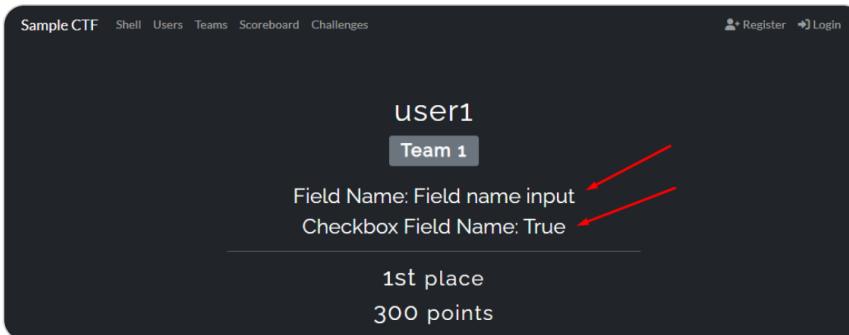

Shown on public profile

Specify if the information added should be shown on the user or team's public profile.

Specify if the information added should be shown on the user or team's public profile.

- Editable by user in profile
- Required on registration
- Shown on public profile

The new fields are displayed on a user's public profile as shown in the picture below. If the Checkbox custom field is shown on public profile, it displays true. The fields are also displayed the same way on a team's profile.
