🏠 › Settings › Accounts Settings

Accounts Settings

CTFd allows you to configure the following user and team settings:

Configuration

Account Email Whitelist

Comma-seperated email domains which users can register under (e.g. ctfd.io, gmail.com, yahoo.com)

Verify Emails

Disabled

Control whether users must confirm their email addresses before playing

Team Creation

Enabled

Control whether users can create their own teams (Teams mode only)

Team Size

Amount of users per team (Teams mode only)

Total Number of Teams

Max number of teams (Teams mode only)

Team Disbanding

Enabled for Inactive Teams

Control whether team captains are allowed to disband their own teams

Incorrect Submissions per Minute

Amount of submissions allowed per minute for flag bruteforce protection (default: 10)

Name Changes

Disabled

Control whether users and teams can change their names

Update

User Mode Options

Account Email Whitelist

Specify email domains allowed to register on CTFd by Whitelisting Email Addresses.

Verify Emails

You can choose whether to allow users to confirm their email addresses before playing.

Incorrect Submissions per Minute

Specify the amount of submissions allowed per minute for flag bruteforce protection (default: 10)

Name Changes

Control whether users and teams can change their names

Teams Mode Options

You can further configure these options when your CTFd instance is in Teams Mode. You can learn more about user or team modes in this article.

Team Creation

Control whether users can create their own teams.

Team Size

Control the amount of users per team.

Total Number of Teams

Control the maximum number of teams that can be created.

Team Disbanding

Control whether team captains are allowed to disband their own teams.
